

SAVE THE DATE

International Workshop on **Membrane Engineering**

2026
June 14-17
Naples
Italy

Conference Chairs

Alberto Figoli, *Institute on Membrane Technology (ITM-CNR)*

Luca Fortunato, *University of Napoli Federico II*

Stefano Guido, *Co-Chair, University of Napoli Federico II*

Giovanna Tomaiuolo, *University of Napoli Federico II*

Topics

Pre-treatment methods for membrane processes

Membrane fouling, biofouling, scaling and mitigation

Membranes for seawater and brackish water desalination

Membrane materials. Synthesis, modification and characterization

Membrane distillation, osmotic distillation, membrane crystallization

Membranes in wastewater treatment

Forward osmosis, pressure retarded osmosis

Membrane Processes, Industries and Emerging Applications
